1. Age eligibility condition

Your registration terms should clearly state that profiles must meet the legally permitted marriage age:

```
Male: 21 years or above
Female: 18 years or above
```

The Prohibition of Child Marriage Act defines a child as a male below 21 or a female below 18. Do not permit profiles created for an underage bride or groom.

Add a checkbox:

```
☐ I confirm that the bride/groom meets the legal marriage-age requirement.
```

2. Matrimonial-purpose-only condition

Clearly state:

> This platform is intended only for lawful matrimonial purposes and is not a dating, escort or casual-relationship service.

Also prohibit:

- Commercial advertisements through profiles
- Sexual or obscene content
- Prostitution or escort services
- Harassment
- Money requests and scams
- Fake identities
- Creating profiles without the person's knowledge

3. Consent for profiles created by parents

Since parents often create profiles, include:

> A parent, sibling, relative or guardian creating a profile confirms that they have permission from the person whose profile is being created.

Add registration options such as:

```
Profile created by:
Self
Parent
Sibling
Relative
Guardian
```

Do not allow someone to upload another person's photo, phone number or personal details without permission.

4. Privacy Policy

Your Privacy Policy must explain:

- What information you collect
- Why you collect it
- How long you keep it
- Who can see it
- Whether you share it with payment, SMS, email or hosting providers
- How users can correct or delete it
- How users can withdraw consent
- How users can contact you regarding privacy issues

Matrimony profiles may contain highly personal data such as photos, phone numbers, salary, caste, horoscope, disability and marital status. The Digital Personal Data Protection Act requires clear notice, lawful purpose and valid consent when processing personal data.

Use separate consent checkboxes:

```
☐ I agree to the Terms and Conditions.
☐ I have read the Privacy Policy.
☐ I consent to my profile information being displayed to eligible users.
```

Do not keep these boxes selected automatically.

5. Profile visibility and contact privacy

Give users controls for:

```
Show photo to everyone
Show photo only after interest acceptance
Hide mobile number
Hide email
Hide salary
Hide horoscope
Hide exact address
Hide profile temporarily
Delete profile permanently
```

Do not publicly display:

- Aadhaar number
- PAN number
- Full residential address
- Identity-document images
- Bank details
- OTP
- Password
- Exact workplace address

6. Verification disclaimer

You may verify mobile numbers, email addresses or identity documents, but do not promise that every verified profile is completely genuine.

Use wording like:

> Verification indicates that certain submitted information or contact details were checked. It does not constitute a guarantee regarding the character, intentions, financial status or truthfulness of a member.

Never write:

```
100% guaranteed genuine profiles
Guaranteed marriage
Guaranteed perfect match
```

unless you can legally and factually prove the claim.

7. Platform disclaimer

Your Terms should state that the website:

- Provides profile discovery and communication facilities
- Is not a marriage broker unless you actually provide brokerage
- Does not guarantee marriage or compatibility
- Is not responsible for offline conduct between members
- Does not verify every claim unless specifically marked
- Advises users to independently verify education, job, income, family and marital status

However, a disclaimer does not remove your obligation to act on fraud, impersonation, harassment or illegal content reports.

8. User-content conditions

Users should agree that they will not upload:

- Fake photos
- Celebrity or third-party photos
- Obscene material
- Misleading educational or employment details
- False salary information
- Discriminatory or abusive descriptions
- Someone else’s phone number
- Copyrighted content without permission

Include permission for moderation:

> The platform may review, hide, reject, suspend or delete profiles that violate its policies.

9. Report, block and grievance system

Every profile should have:

```
Report Profile
Block Profile
Report Photo
Report Message
```

Report reasons may include:

```
Fake profile
Already married
Underage person
Harassment
Money scam
Wrong photo
Impersonation
Obscene content
Incorrect information
```

Publish a grievance contact and keep an internal record of complaints and actions taken.

10. Premium payment conditions

Before accepting payment, clearly display:

- Plan price
- GST, when applicable
- Plan duration
- Features included
- Contact-view limits
- Interest limits
- Auto-renewal status
- Cancellation terms
- Refund eligibility
- Payment-failure handling
- Whether unused credits expire

Example:

> Membership fees are non-refundable after contact details or paid services have been accessed, except where required by law or where the service was not provided due to a platform error.

Do not hide important restrictions after payment. Consumer-protection laws can apply to paid online services and misleading claims.

11. Account deletion condition

Provide a visible method to:

```
Deactivate profile
Delete profile
Request personal-data deletion
Withdraw consent
Download or correct profile data
```

Explain whether certain records may still be retained for legal, fraud-prevention, accounting or security reasons.

12. Security requirements

Before hosting, implement:

- HTTPS/SSL
- Password hashing
- CSRF protection
- SQL-injection protection
- XSS protection
- OTP rate limiting
- Login-attempt limiting
- Secure file-upload validation
- Image MIME-type validation
- Admin two-factor authentication
- Database backups
- Audit logs
- Restricted admin permissions
- Encryption for sensitive documents
- Malware scanning for uploads

CERT-In directions also impose cyber-incident reporting and log-related obligations on covered entities. CERT-In materials refer to secure retention of logs for a rolling period of 180 days.

13. Identity-document rules

When collecting an ID:

- Explain why it is needed
- Take explicit consent
- Restrict access
- Encrypt it
- Never display it publicly
- Delete it when no longer required
- Mask document numbers
- Do not casually require Aadhaar

Prefer verification methods such as:

```
Mobile OTP
Email verification
Manual selfie/profile-photo review
```

```
Masked ID verification
Video verification
```

14. Photo usage permission

Include:

> By uploading a photograph, the user confirms that they own it or have permission to use it and authorises the platform to display it according to the selected privacy settings.

The IT Act contains privacy protections relating to the unauthorised capture, publication or transmission of private images.

15. Jurisdiction clause

Your Terms should mention:

```
Applicable law: Laws of India
Court jurisdiction: Your business district/state
```

For example:

> These Terms shall be governed by the laws of India. Subject to applicable consumer law, courts located in Erode District, Tamil Nadu shall have jurisdiction.

Have a lawyer review this clause because consumer disputes cannot always be restricted solely through a jurisdiction statement.

Minimum launch checklist

Before making **Valluvan Matrimony** live, ensure that you have:

```
✓ Domain and SSL
✓ Business owner information
✓ Terms and Conditions
✓ Privacy Policy
✓ Refund Policy
✓ Safety Guidelines
✓ Grievance contact
✓ User consent checkboxes
✓ Age validation
✓ Parent-created-profile consent
✓ Report and block functions
✓ Profile deletion function
✓ Photo/contact privacy controls
✓ Secure payment gateway
✓ Admin moderation
✓ Database backup
✓ Security and activity logs
```

Do not copy another matrimony website's legal pages word-for-word. Prepare policies matching exactly what your own website collects, displays, charges and shares, and get the final versions

reviewed by an Indian technology/privacy lawyer before commerci
